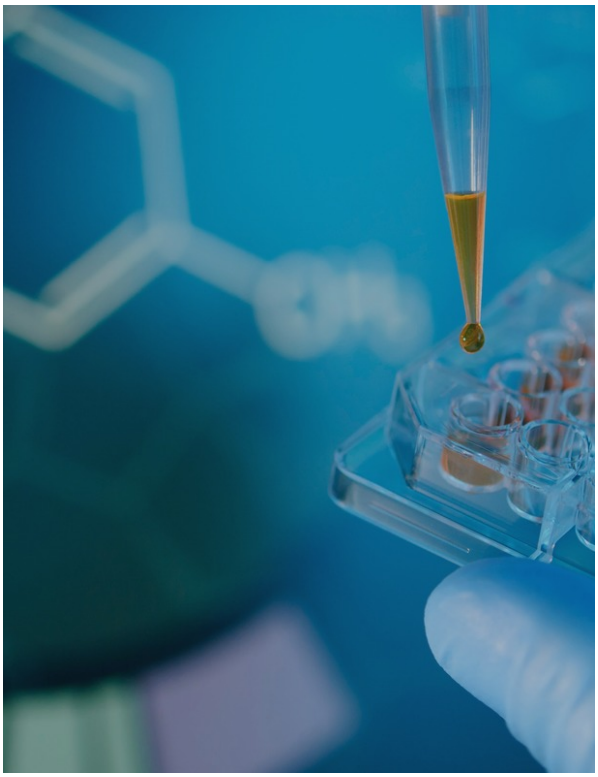
ORANGE COUNTY LABS

Who We Are

Orange County Labs is a full-service, high-complexity clinical laboratory serving healthcare providers and patients with an integrated portfolio of routine, specialty and molecular testing.

Our experienced laboratory and client-service teams combine responsive communication, efficient workflows and dependable results to help clinicians make informed decisions and keep patients moving forward.



Our purpose

Make high-quality laboratory services easier to access, easier to navigate and more personal for every provider and patient we serve.

OUR COMMITMENT

- Patient-centered service
- Quality and integrity
- Clear, responsive communication
- Continuous improvement and innovation

Our Vision

A healthcare environment where advanced diagnostics, dependable service and personalized support work together to improve the health of the people and communities we serve.

Values in Action

QUALITY

Consistent processes and dependable results.

INTEGRITY

Honest, responsible and transparent service.

SERVICE

Responsive support designed around real needs.

INNOVATION

Thoughtful use of technology and modern workflows.

DEPENDABILITY

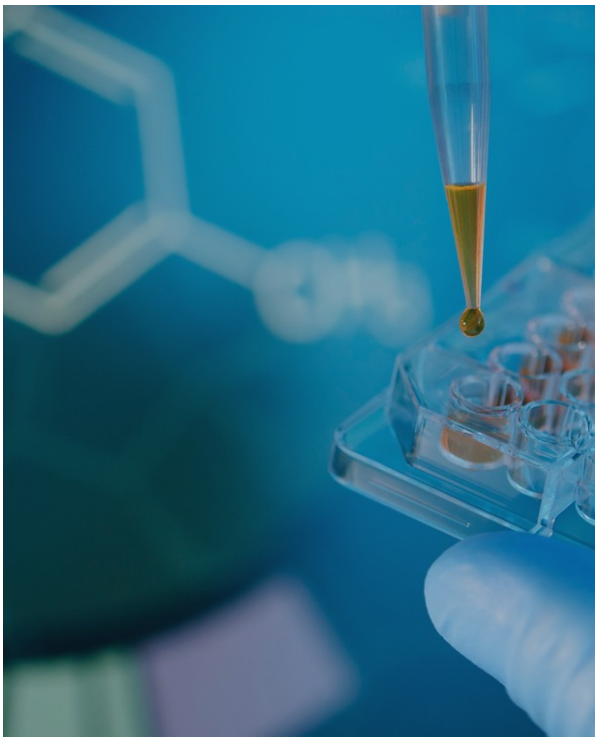
Reliable communication and follow-through.

ACCOUNTABILITY

Ownership of every specimen, question and outcome.

OUR PROCESS

A Connected Testing Experience



1

ORDER

Convenient ordering workflows support provider offices and authorized care teams.

2

COLLECT

Coordinated specimen collection, supplies, courier support and mobile options where available.

3

TEST

High-complexity testing performed through validated laboratory workflows and quality controls.

4

RESULT

Secure result delivery with responsive support for status questions and follow-up needs.

Technology that supports service

Our laboratory information and reporting workflows are designed to support secure ordering, electronic result delivery, longitudinal review and connectivity with compatible practice systems.

AN INTEGRATED PORTFOLIO

Testing Services

A broad testing portfolio helps providers consolidate workflows while maintaining access to specialized diagnostic support.

Clinical & Special Chemistry

Routine and specialized blood and body-fluid testing supporting wellness, diagnosis and ongoing care.

Hematology & Coagulation

Testing that supports evaluation and monitoring of blood cells, clotting and related conditions.

Women’s Health

Testing options supporting preventive care, symptomatic evaluation and reproductive health.

Molecular Infectious Disease

Targeted molecular testing to support timely identification of selected infectious pathogens.

Urinary Tract Infection

Testing options designed to support identification of urinary pathogens and clinically relevant resistance markers.

Toxicology

Screening and confirmation services supporting medication monitoring and clinical decision-making.

Pharmacogenetics

Genetic insights that may help qualified clinicians evaluate medication-response considerations.

Genetics & Oncology

Selected inherited-risk, carrier and oncology-related testing available according to current test-menu offerings.

Test availability, specimen requirements and turnaround times vary. Contact OC Labs for the current test menu.

BUILT AROUND YOUR PRACTICE

Responsive Client Support

One relationship. Clear communication. Practical support.

Our client-service team helps coordinate ordering, supplies, specimen logistics, result questions and account support—so your team can stay focused on patient care.

ACCOUNT SUPPORT

A dedicated point of contact for day-to-day service needs.

COURIER COORDINATION

Customized pickup scheduling based on service area and availability.

DIGITAL WORKFLOWS

Secure ordering and result-delivery options, including compatible interfaces.

TIME-SENSITIVE NEEDS

Priority coordination and STAT options for eligible tests and locations.

MOBILE & CONCIERGE SERVICES

Care Beyond the Laboratory

OC Labs helps extend access through coordinated mobile and concierge specimen-collection services for eligible patients and locations.

- Homes and offices
- Senior living and skilled-nursing settings
- Schools, employers and community organizations
- Special events and coordinated care programs

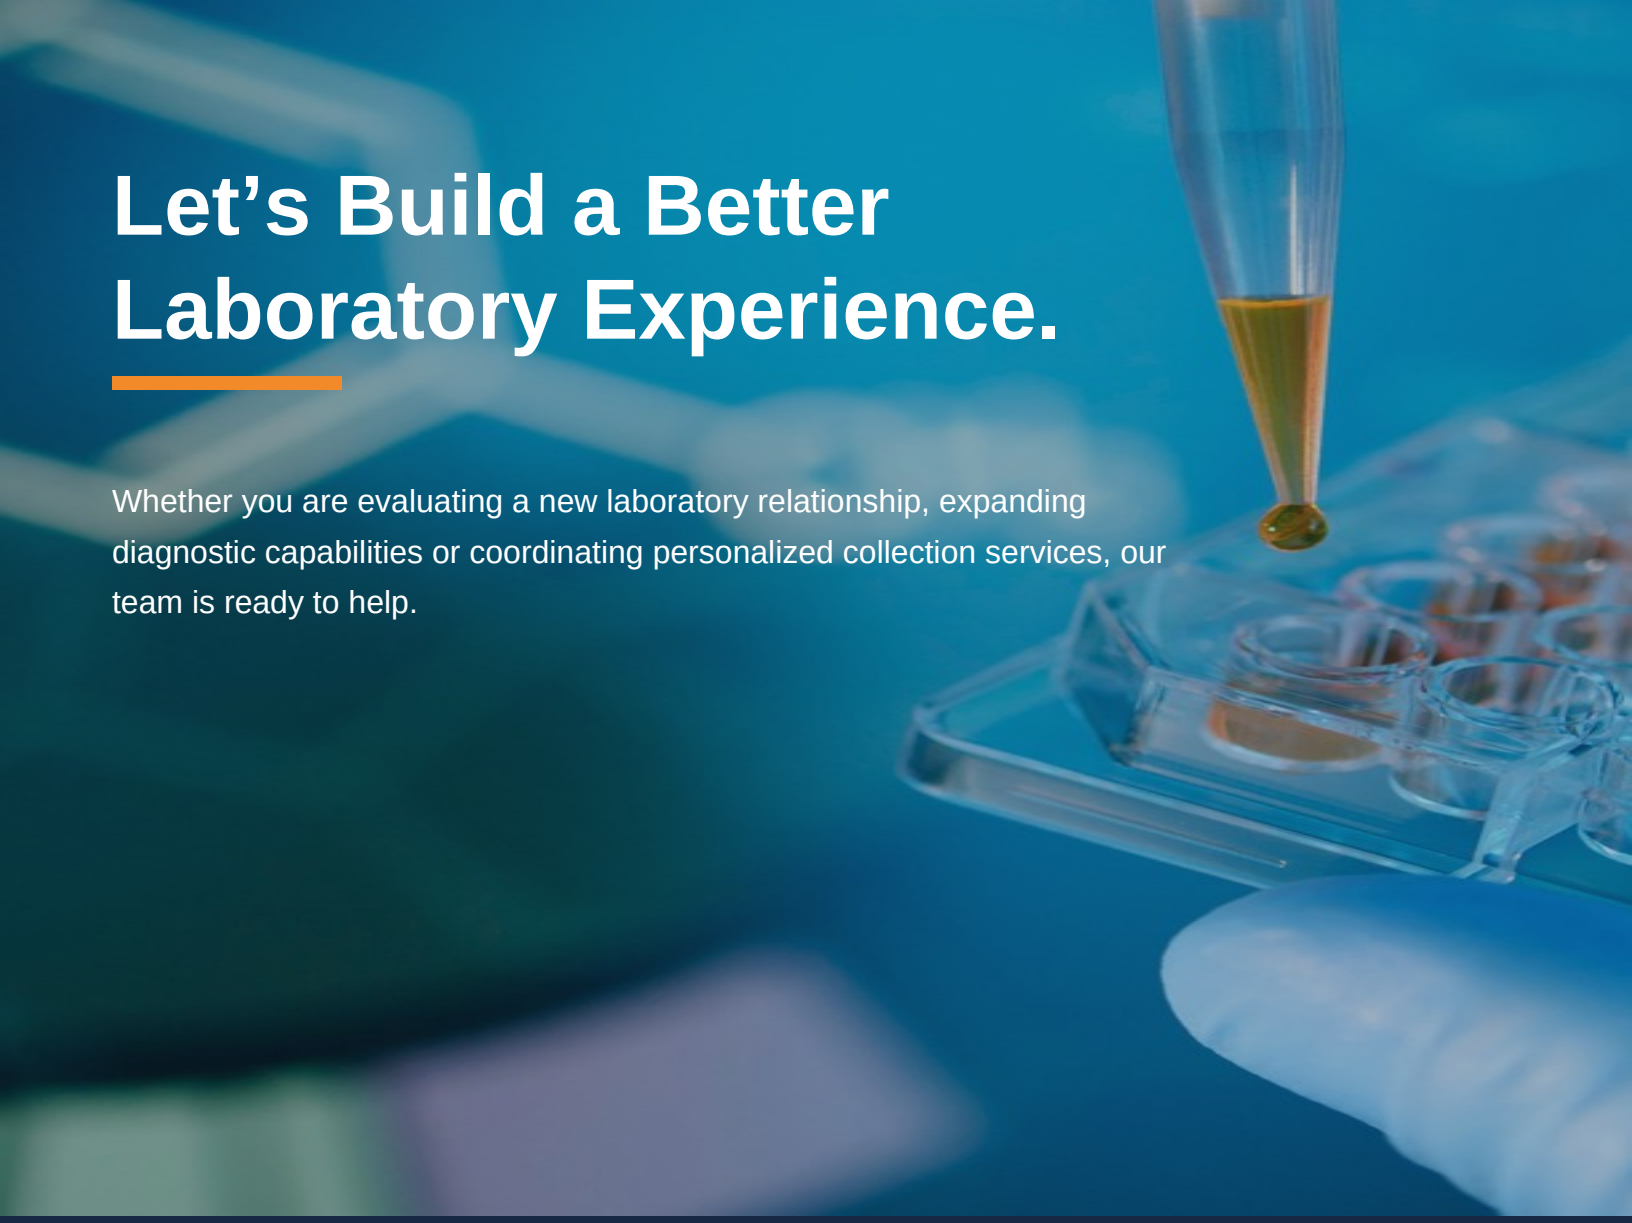
A simpler experience from scheduling to results

Our team can help coordinate collection requirements, patient demographics, supplies, pickup logistics and secure result delivery through a single service pathway.

HOME & OFFICE COLLECTION PRICING

WITHIN 10 MILES	10.1+ MILES
$55	$85

Phlebotomy or specimen collection. A minimum of 24 hours' notice is required. Secure your appointment with payment upon booking. Specimens are processed the same day for next-day results.



Let’s Build a Better Laboratory Experience.

Whether you are evaluating a new laboratory relationship, expanding diagnostic capabilities or coordinating personalized collection services, our team is ready to help.
